\$50,000 grant pool

This year, a proportionate \$50,000 grant pool is waiting! Your community's grant is set by its share of all survey responses received countywide—the more of the total responses your community contributes, the bigger its piece of the \$50,000.

10%

of all countywide responses → roughly \$5,000 for your community*

20%

of all countywide responses → roughly \$10,000 for your community*

30%

of all countywide responses → your community claims the largest share*

*Examples only. Final grant amounts depend on total responses received across the county. Maximum share per community is capped at 30% of the pool.
